

Horticultural Potting Grit

Lime free washed granite angular grit

Ideal for:

Perfect drainage
for compost

Ponds & aquatic
planting

Prevents fish from
stirring up soils

Perfect for
alpines & rock
gardens

Adding to composts

Mix one part loam to one part Horticultural Grit and one part leafmould or coir as an ideal planting mix for a rock garden.

Aquatic planting

For ponds and aquatic planting, apply a thin layer of Horticultural Potting Grit to the top of the container. This will prevent fish from stirring up the soil.

Other useful tips

1. A great mix for soil, alpines and rock gardens is four parts garden soil or loam to one part sharp sand or fine grit.
2. Cover your pots or trays of sown seeds with a fine sprinkle of grit to prevent drying out as your seeds germinate.

Pack size

Our Kelkay Horticultural Potting Sand is available in Large and Handy Pack sizes to give you just the right amount to help you complete your job.
