

Horticultural Washed Gravel

Washed 10mm quartzite grit

Ideal for:

Top dressing
plant pots

Top dressing
beds & borders

Crocking &
drainage

Rock gardens

Use in a scree garden

Add gravel to a scree garden to replace the subsoil and create a layer that the topsoil will sit on. Topsoil for a scree garden should be 2 parts topsoil, 2 parts Horticultural Washed Gravel and 1 part Horticultural Sharp Sand.

Use as a mulch

Top-dress borders, potted plants and hanging baskets with a layer of gravel to minimise any water loss and prevent weeds germinating.

Other useful tips

1. If you are planning a drought-resistant garden, mulch your border with 5-7.5cm of gravel to help maintain moisture while the plants establish.

2. Use as mulch to minimise any water loss and prevent weeds. Avoid drought by mulching your borders with 5-7cm of gravel to help maintain moisture.

Pack size

Our Kelkay Horticultural Washed Gravel is available in Large and Handy Pack sizes to give you just the right amount to help you complete your job.
